To whom it may concern:

With this letter I would like to express my interest in your company and in the Graphic Designer position.

I just finished with the Erasmus entrepreneur program, with which I was working in the Studio Martina Flor in Berlin and before as a freelance and for almost three years for the company Seion projects in the position of graphic designer. I believe that the skills and experiences I have gained at these positions make me an ideal candidate for this job.

As a graphic designer, I have gained and can demonstrate my experience developing designs for campaigns o projects presentations based on my profound knowledge of Adobe Creative Suite, a passion for creative design, a experienced in digital brand advertising and CRM communications.

I've also been successful creating different webs in my last position and daily content for all social media as well as designing presentations and print/ web material for Company projects or collaborations with other brands.

I like to think that I am a perfectionist in my work, so deadlines and feedback are the basis of my work, since I am of the opinion that everything can be improved and that if you are going to do something there is something to do all right.

I consider myself as a team player although I feel comfortable working on individual tasks. I have strong analytical skills and I'm good problem-solving person. I am self- motivated and efficient in terms of maximizing resources, well organized and very good at managing timing. Initiative and determination are essential qualities to me. I have a creative nature, passionate about the design world.

While this is hard to prove in a piece of paper, I would be more than happy to meet you to discuss my credentials.

Thank you for considering my request. Sincerely,

Concepcion Bonnet Molina.
